The screenshot displays the Windows Live Movie Maker application window. The title bar reads "MSample - Windows Live Movie M...". The menu bar includes "常用", "動畫", "視覺效果", "專案", "檢視", and "視訊工具". The "視訊工具" menu is open, showing the "編輯" (Edit) option. The main workspace is divided into two panes. The left pane shows a video preview of a jellyfish with a timeline on the right. The timeline has a duration of 00:09.00/ and a list of time markers from 1.00 to 30.00. The right pane shows a list of video clips. The first four clips are highlighted with a red box: "A 10101...", "A 這是古城", "A 花朵", and "A 水母". A red arrow points from a text box below to this red box.
